PROFESSIONAL SUMMARY

Google IT Support certified IT Support Specialist with 3+ years of experience in technical support, systems operations, user support, device management, records management, and troubleshooting. Experienced in supporting computer labs, CBT systems, hardware/software issues, Linux CLI, network troubleshooting, Git, Microsoft Office Suite, Google Workspace, and customer-facing support. Strong ability to resolve issues quickly, document root causes, support 50+ users, and coordinate technical activities across teams.

KEY ACHIEVEMENTS

- Supported IT operations and issue resolution for 50+ users across computer lab, CBT, digital learning, and operational systems.
- Helped maintain reliable availability of CBT/computer-lab systems by monitoring issues, escalating faults, and coordinating timely fixes.
- Improved accountability by maintaining support records, operational documentation, technical reports, and transaction logs.
- Supported web development, system setup, CBT deployment, and digital operations projects for school/client environments.
- Built 2 backend-focused projects using Golang, PostgreSQL, REST APIs, JWT, JSON, and Git to strengthen software troubleshooting skills.

CORE IT SUPPORT SKILLS

Technical Support: Help desk support, issue escalation, troubleshooting, user support, documentation, customer education

Systems & Devices: Computer lab setup, CBT system support, hardware/software diagnosis, endpoint support, device management

Networking & Security: Network troubleshooting, IT security awareness, data protection, critical infrastructure awareness

Tools & Productivity: Linux CLI, Git, GitHub, cURL, Microsoft Office Suite, Google Workspace, Slack, Trello, Asana, ticketing/CRM concepts

Backend Exposure: Golang, REST APIs, PostgreSQL, JWT authentication, JSON, API testing, basic debugging

Soft Skills: Problem solving, communication, emotional intelligence, cross-functional coordination, record keeping, reporting

WORK EXPERIENCE

Technical Supervisor & IT Support | HLTS Limited | Lagos, Nigeria | Nov 2023 - Present

- Supervise daily IT operations for computer labs and CBT systems, supporting 50+ users and helping maintain reliable system availability for learning, exams, and business operations.
- Resolve hardware, software, access, browser, and connectivity issues as a primary escalation point, reducing avoidable delays for staff, students, and client stakeholders.
- Install, configure, monitor, and troubleshoot systems used for digital learning, computer-based testing, web support, and technical operations.
- Coordinate support activities across technical staff, management, and school clients to complete system setup, CBT deployment, IT consultation, and digital operations tasks.
- Maintain operational records, support documentation, technical reports, and issue notes to improve accountability, follow-up, and future troubleshooting.
- Support web/software projects and backend learning activities using Linux CLI, Git/GitHub, cURL, Golang, REST APIs, JSON, PostgreSQL, and JWT authentication concepts.
- Trusted with executive-level coordination responsibilities from Nov 2025, supporting management follow-up, operational decisions, and cross-functional communication.

Contract Support Staff - Device Control | Sunking | Lagos, Nigeria | May 2019 - Oct 2019

- Managed device locking/unlocking protocols for customers on installment plans while following payment-compliance procedures and account-control guidelines.
- Maintained accurate transaction logs for assigned support activities, improving accountability, customer support follow-up, and financial reconciliation.

- Educated customers on payment procedures and device-use expectations, helping reduce avoidable user errors and support escalations.

Technical Operations & Web Support | Engreg High School / EHIC | Lagos, Nigeria | Sep 2023 - Sep 2024

- Managed technical infrastructure for coding programs, computer-based assessments, and digital learning operations.
- Supported users with HTML, CSS, JavaScript, browser, device, and system-related issues in a technical support capacity.
- Prepared systems, digital resources, and support materials before programs and exams to help maintain smooth technical operations.

RELEVANT TECHNICAL PROJECTS

School Management System | Golang, PostgreSQL, REST APIs, JWT, bcrypt

- Built a database-backed school system with user registration, login, protected routes, student records, and role-ready backend logic.
- Resolved backend and database issues including schema permissions, duplicate records, route errors, token validation, and port conflicts.

Task Manager Web App | Golang, net/http, HTML, CSS, JavaScript, JSON

- Developed a web-based task board with create, edit, delete, and status-move functionality using Go HTTP handlers and JSON persistence.

CERTIFICATIONS

- Google IT Support Professional Certificate - Google / Coursera (Feb 2026): Technical Support, Networking, System Administration, IT Security
- Introduction to Critical Infrastructure Protection - OPSWAT Academy (May 2026): Cybersecurity Awareness, Critical Infrastructure Protection, Data Protection
- AI Fluency Training - International Organisation of Employers (IOE) and Microsoft (May 2026): Responsible AI, AI for Business, Digital Transformation
- Programming Foundations: Version Control with Git - LinkedIn Learning (Nov 2025): Git, code collaboration, version control
- Conflict Resolution Foundations - LinkedIn Learning (Nov 2025): Emotional intelligence, negotiation, customer issue handling
- Certificate in Tech & Entrepreneurship - Tech & Entrepreneurship Academy (Sep 2022): Business operations and digital innovation

EDUCATION

B.Sc. (Ed) in Mathematics | University of Lagos | Graduated: 2026 | CGPA: 3.70/5.00
